

# JAVAD

## ARWEST

**More than Radio**

# Radio Transceivers

ArWest Communications provides wireless narrow-band radio solutions worldwide. In the USA and Australia, Europe and Russia ArWest modems are used in all kind of communication job. We are committed to creativity, flexibility and customization.

## **AW435BT**

35 W  
406-470MHz transceiver

## **AW400BT**

4 W  
406-470MHz transceiver

---

---

## **AW135BT**

35 W  
138-174MHz transceiver

## **AW100BT**

4 W  
138-174MHz transceiver

## **AW225BT**

25 W  
215-255MHz transceiver

## **AW200BT**

4 W  
215-255MHz transceiver

---

---

## **AW900BT**

1W  
868-870 MHz (Europe) / 902-928 MHz (United States)

---

---

## **L-Band/Beacon Reseiver**

L-Band receiver is designed for multiple applications including particularly geostationary satellite communication networks satellite services. Beacon receiver is designed to receive pseudorange corrections transmitting by Radiobeacon stations.

# JLink Lite

## Wireless network RTK field access point

- Embedded GPS L1 functionality allows using JLink Lite as standalone wireless network RTK field access point.
- 1 W UHF Radio Transceiver
- Quad band GSM/GPRS module.

---

---

# Bluetooth Module

Scale 1:1

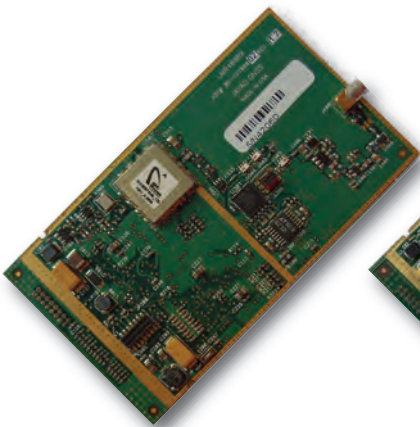

BT4EX8M module is designed for industrial use and makes your market advancement more simple and fast. The module can be used at extremely low and high temperatures in a wide spectrum of Bluetooth applications.

---

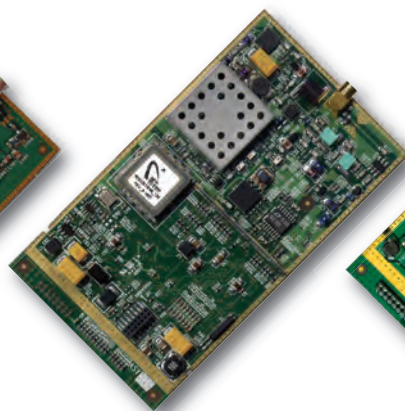

---

# OEM Solutions

DSP based OEM Radio Modems with Built-in wireless link Monitoring and Management Tools.

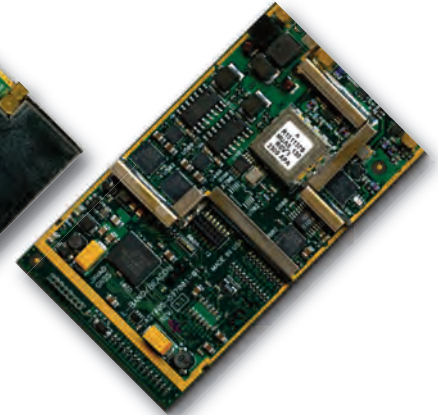

AW400Rx

AW100Tx/AW200Tx/  
AW400Tx

FH915

L-Band/Beacon  
Receiver OEM
