ARWEST

More than Radio

Radio Transceivers

ArWest Communications provides wireless narrow-band radio solutions worldwide. In the USA and Australia, Europe and Russia ArWest modems are used in all kind of communication job. We are committed to creativity, flexibility and customization.

AW435BT

35 W
406-470MHz transceiver

AW400BT

4 W
406-470MHz transceiver

AW135BT

35 W
138-174MHz transceiver

AW100BT

4 W
138-174MHz transceiver

AW225BT

25 W
215-255MHz transceiver

AW200BT

4 W
215-255MHz transceiver

AW900BT

1W
868-870 MHz (Europe) / 902-928 MHz (United States)

L-Band/Beacon Reseiver

L-Band receiver is designed for multiple applications including particularly geostationary satellite communication networks satellite services. Beacon receiver is designed to receive pseudorange corrections transmitting by Radiobeacon stations.

JLink Lite

Wireless network RTK field access point

- Embedded GPS L1 functionality allows using JLink Lite as standalone wireless network RTK field access point.
- 1 W UHF Radio Transceiver
- Quad band GSM/GPRS module.

Bluetooth Module

Scale 1:1

BT4EX8M module is designed for industrial use and makes your market advancement more simple and fast. The module can be used at extremely low and high temperatures in a wide spectrum of Bluetooth applications.

OEM Solutions

DSP based OEM Radio Modems with Built-in wireless link Monitoring and Management Tools.

AW400Rx

AW100Tx/AW200Tx/
AW400Tx

FH915

L-Band/Beacon
Receiver OEM
